

AFFILIATE LAUNCHES MADE SIMPLE with Matt McWilliams

No Product, No Problem: How to Monetize Your Platform with Affiliate Marketing

You are cordially invited to the creation of our next product, No Product, No Problem. The course will release early next year, but you can join us LIVE for the creation of the entire product.

Early next year, we are releasing our long-awaited, often demanded affiliate marketing course. The course is all about monetizing your platform without creating a product.

The title of the course is No Product, No Problem and it will go on sale early next year.

What's Inside the Course

In it, I'll reveal the exact strategies that I used to make more than \$134,000 in affiliate commissions and jumpstart my online business...all before I ever created my first product.

I'll also share the strategies used by other top affiliates for our clients such as Michael Hyatt, Ray Edwards, and Jeff Goins.

But I'm not only sharing the methods of the all-stars in online marketing with their massive lists and hundreds of thousands of followers. I'll show you people just like you, with little or no list and traffic, can get started monetizing your site.

I'll share the exact blueprint they use and I've used to build my online business using affiliate marketing.

We'll cover topics such as:

- The right mindset for affiliate marketing
- How to find the right programs for your platform
- How to get accepted into affiliate programs
- Conditioning your audience to buy
- How and when to promote
- Copywriting for affiliates
- List building
- How to start with no list
- How to promote evergreen offers and launches
- How to get others to promote your products when the time is right

Live Course Creation

While the course will not be available until early next year, you can get an early peak and follow along as we create the course before it is available.

That's right...we are literally creating the course from start to finish in one day. My team and I have a general outline based on the feedback from my readers and we are going to let you follow along live.

There will also be a special discount to pre-order for anyone who joins us live.

What Will It Cost?

This course is all about making your first \$1,000 online before you create a product. As such, I wanted more than anything to make this course affordable for people starting out.

With all of the course content we'll have (nearly 10 hours worth of gold) we originally planned on charging a minimum of \$297. For one-on-one coaching from one of my team members, you'd pay more than \$3,000.

Plus, for Fast Movers (those who purchase in the first 48 hours) you'll get the Bonus of a Lifetime:

Unlimited Q&A for 30 Days

That's right...you can literally ask all the affiliate marketing questions you want for 30 days.

If you have a question every day, we'll answer it. If you have five questions a day, we'll answer all 150. If you have twenty a day...well, you aren't watching the course content!

All of this is easily worth \$297 or more, but when the course goes on sale to the public next year, it will sell for only \$197. Again, I want to make it affordable to people getting started. We'll even have an option to divide it into three payments.

If you follow what I teach and put in the work, you will see a significant return on your investment. You will have an online business that is actually making money. You will be reaping all of the benefits of affiliate marketing.

Special Limited Time Price

When the course goes on sale to the public next year, it will cost \$197, which is a great price.

But for a limited time, it will only cost \$97. And heck, if you show up tomorrow, I'll share an even lower price with you.

This offer is only available to the **first 50 buyers** at that price. After that, we'll shut the doors while we get feedback on the course and make it available publicly next year.

Click below to sign up to be notified of when we create the course live so you can get your special one-time discount and early bird bonus, and be on your way to affiliate marketing success!
